## STRAC (TSA-P)

### Trauma Alert Criteria

## Adult Patients > 16 Years of Age

1 Red or 2 Blue Criteria = TRAUMA ALERT\*

Choose all that apply.

### One or More Red Criteria

- R1** GCS  $\leq$  12 due to trauma
- R2** ACTIVE airway assistance required (i.e., more than supplemental O<sub>2</sub> without airway adjunct)
- R3** No radial pulse AND heart rate  $\geq$  120
- R4** BP < 90 systolic
- R5** Best Motor Response  $\leq$  4
- R6** Acute Paralysis, loss of sensation, or suspected spinal cord injury
- R7** Amputation proximal to wrist or ankle
- R8**  $\geq$  15% BSA 2nd / 3rd degree burns
- R9** Penetrating injury to head, neck, torso, excluding superficial wounds
- R10** Pulseless Injured Extremity
- R11** Two or more long bone fractures (on different extremities)

\*Paramedic Intuition – No Red criteria identified BUT Severe Injury suspected.

Methodist AirCare • Patient Placement Services

## Two or More Blue Criteria

- B1** Reliable loss of consciousness > 5 minutes
- B2** Sustained respiratory rate  $\geq 30$
- B3** Sustained heart rate  $\geq 120$  (with radial pulse) and BP  $\geq 90$  systolic
- B4** Best Motor Response = 5
- B5** Degloving injury or flap avulsion > 5 inches
- B6** Single long bone fracture site due to Motor Vehicle Crash
- B7** Single long bone fracture site due to fall from  $\geq 10$  feet
- B8** Age  $\geq 55$
- B9** Ejection from vehicle (excludes open vehicles)
- B10** Driver with deformed steering wheel
- B11** Death in the same vehicle
